aequationes mathematicae is published by the University of Waterloo and Birkhäuser Verlag.
The journal publishes papers in pure and applied mathematics in general, but, in particular, papers on functional equations, combinatorial and numerical analysis. The languages in which papers will generally be accepted are English, French, and German.
Types of manuscripts that will be considered for publication include original research papers, problems and their solutions, research survey papers and self-contained summaries of papers which have been accepted for publication either by this or some other journal with a referee system.
Manuscripts of papers should be submitted to the Editorial Office or to a member of the editorial board. Authors of papers should send the original and two additional copies. Since it is the policy of the journal to publish summaries of accepted papers (in advance, if a long delay in publication is anticipated), authors should include with the original manuscript a self-contained summary of not more than 33 lines which contains a statement of the main results of the paper. Authors should also include an AMS classification for their paper.
